Partitioning Solutions

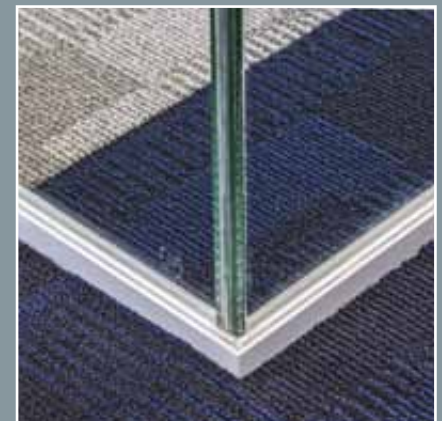

## Spectrum glazed partitions SG or DG

Offering a striking yet simple design, available in either single or double mullion free glazing options, Spectrum creates the illusion of space, light and confidentiality without the need for solid walls.

Enclosed but not visually restricting, the glazed walls provide the perfect answer to today's management requirements for full engagement with all factions of the office workspace.

With minimal perimeter framing - Spectrum SG or DG versions use a unique and minimalistic VHB tape, which allows the glass to glass joint to be totally unobtrusive in appearance. Spectrum provides clear vision, clean and elegant lines and provides architects and end users alike the opportunity to create imaginative office designs with the introduction of stylish manifestation designs.

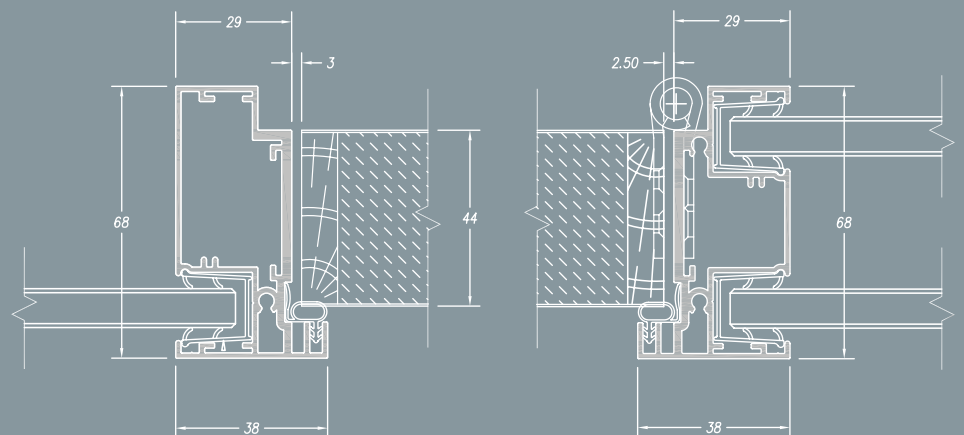

## Doors and frames SG or DG

Slim and aesthetically pleasing aluminium frames together with timber frames are available to meet most specification requirements.

The frames can be supplied in standard heights or to specification.

Glass or solid veneered doors are available to specification, as is the choice of glazing configurations in clear toughened or acoustic laminated, providing acoustic performance of between 34dB and 46dB – dependent upon glass specification.

## Finishes

Spectrum SG or DG systems are available as standard in RAL 9010 or RAL 9006. Alternatively, it can be supplied in any RAL colour finish to meet specific design requirements.

## Acoustic performance

Spectrum SG and DG can be supplied in many different facets and configurations to meet most office requirements. Using toughened, laminate or laminated acoustic glass, the acoustic performance ranges from 34dB to 46dB - dependent upon exact glass specification.

## Manifestation

Film, ceramic bake, digital printing or a sand blasted finish, can be provided to meet specific design criteria.
